

## # JOB DESCRIPTION: MACHINE LEARNING ENGINEER

**\*\*Company:\*\*** Innovate AI Corp

**\*\*Location:\*\*** Remote / Hybrid

**\*\*Experience Level:\*\*** Mid-Senior

---

### #### ROLE OVERVIEW

We are seeking a Machine Learning Engineer to bridge the gap between data science and production. You will build, deploy, and monitor scalable ML systems that power our core products.

### #### RESPONSIBILITIES

- \* **\*\*Model Deployment:\*\*** Transition research prototypes into production-ready microservices.
- \* **\*\*Infrastructure:\*\*** Maintain and scale ML pipelines using Docker and Kubernetes.
- \* **\*\*Optimization:\*\*** Improve model performance, accuracy, and inference speed.
- \* **\*\*Collaboration:\*\*** Work with Data Scientists to define feature engineering requirements.

### #### REQUIREMENTS

- \* **\*\*Education:\*\*** BS/MS in Computer Science, Math, or related field.
- \* **\*\*Experience:\*\*** 3+ years in a production ML role.
- \* **\*\*Coding:\*\*** Mastery of Python and experience with PyTorch/TensorFlow.
- \* **\*\*Cloud:\*\*** Familiarity with AWS, GCP, or Azure ML services.

### #### BENEFITS

- \* Competitive Salary + Equity
- \* Flexible PTO and Remote Work options
- \* Annual Learning & Development budget
